	2 . <	AF-2	Promised for shipment March 15.
	ц.	Kodak	Promised for shipment May 31.
Duplicator- Mech.	1	AF-1	Code target optical alignment complete. Awaiting photographic test for final OK. Optical alignment of scanner under way. Wiring of base cabinet 50% complete.
	2	AF-2	In final assembly. Optical alignment not yet started.
	3	H	In assembly.
	14	Kodak .	Held up.
Duplicator Control			The writing of a program and summary for Mode D is complete. The summary for Mode A is written. Work has started on detailed logic block diagrams. The logical package test procedures are approximately 60 percent written up. A component acceptance test is under way on Raytheon cores. Performance characteristics for plug-in packages have been completed and released. The No. 2 cabinet is painted. The No. 1 cabinet will be ready for painting March 28.

BIWEEKLY MINICARD STATUS REPORT -- 3

March 29, 1956

Equipment	Serial Number	Order	Status
Selector Mech.	1	AF-1	Development of card transport mechanism is complete. 350,000 cards have been passed from one magazine to snother without failure at the rate of 20 cards per second. The plunger actuating mechanism is being redesigned to withstend higher impact loading. A horizontal vacuum sealing window has been included at the reading station so that the scanner light traverses the window only once. Bit amplifiers have been received from Magnavox and are undergoing tests. Wiring will be complete April 10.
	2	AF-2	Some mechanical work being done when shop time is available. Bit amplifiers are being tested.
	3	Kodak	Held up.
Selector Control	1	AF-1	3C engineers coming April 2 to make minor changes mentioned in previous reports.
	2	AF-2	In manufacturing. Logical design complete.
Filing Sorter	1	AF-1	Essentially complete. Waiting for Minicards for final testing.
	2 (AF-2	Ready to start scanning.
	3	Н	In assembly.
			Development - Studies on the window transmission problem indicate that

Development - Studies on the window transmission problem indicate that transmission can be increased from 73 percent to 87 percent. Tests are continuing. A program is in progress to arrive at a standard of sensitivity and a time constant for cell arrays used in the Minicard code readers.

SCHEDULE

PART I - STATEMENT OF WORK (a) The Contractor shall, within the period of time specified in Part VI hereof, furnish and deliver to the Government the following services and supplies:

Item 1 - Investigation and Study leading to the design of an Information and Intelligence Data Handling System in accordance with Exhibit "A" consisting of "Purchase Request Continuation Sheet for: Minicard Information and Intelligence Data Handling System," dated 14 April 1954 as amended by Amendment No. 1 dated 30 April 1954, which are attached hereto and hereby made a part of this Contract.

Note: Exhibit "A" is further amended as follows:

- 1. The words "and design" appearing in the second line of paragraph 3.2.1 of Exhibit RADC-1695 are deleted and the words "leading to" substituted in lieu thereof.
- 2. The words "examination of" are inserted in the fourth line of paragraph 3.2.1 of Exhibit RADC-1695 immediately following the word "include" and before the word "handling."
- 3. The word "provide" appearing in the second line of paragraph 3.2.2.1 is deleted and the word "recommend" is substituted in liqu thereof.
- 4. The provisions of USAF Specifications No. 40146-A and Exhibit RANC 3000-B will be followed whenever possible and deviations therefrom will be permitted only to the extent that the application of commercial development prohibits strict adherence to the specifications.
- Item 2 Two (2) cets Interim Engineering Reports for Item 1 in accordance with aforesaid Exhibit FA," as amonded
- Item 3 One (1) each Engineering Model, Information and Intelligence Data Handling System, in accordance with the aforesaid Exhibit "A," as amended
- Item 4 One (1) set Interim Letter Progress Reports for Items 1 and 3 in accordance with the aforesaid Exhibit "A," as amended
- Item 5 One (1) set Final Engineering Report for Items 1 and 3 in accordance with the aforesaid Exhibit "A," as amended

CHEDULE

ii of vi

- Item 6 One (1) set Reproducible Copies of Engineering Sketches, Drawings and Design Data in accordance with the aforesaid Exhibit "A," as emended
- Item 7 Seven (7) copies Handbook of Instructions for Item 3 in accordance with the aforesaid Exhibit "A," as amended
- Item 8 One (1) each List of Spare Parts in accordance with the aforesaid Exhibit "A," as amsided
- Item 9 One (1) kit Interim Spare Parts in accordance with the aforesaid Exhibit "A," as amended
 - Note: The exact components of spare parts to be delivered under Item 9 will be determined by the Contracting Officer upon review of list of Spare Parts delivered under Item 8.
- (b) Each report shall be plainly marked to indicate the existence of copyright, proprietary or patent information within the contents of the report.

PART II - ESTIMATED COST

STATINTL iv of vi

SCHEDULE

PART VI - DELIVERY

(a) All equipment described in Part I shall be packed in accordance with applicable specifications, and will be delivered to the Government FOB Washington, D. C. in accordance with the following schedule:

TIM.	QUANT ITY	<u>DELIVERY DATE</u> 1 January 1956
2	One (1) set	1 January 1955
2	One (1) set	1 October 1955
3	One (1) cach	1 January 1956
4	Ona (1) set	Monthly
5	One (1) set	1 February 1956
6	One (1) set	1 February 1956
7	feven (7) copies	1 January 1956
8	One (1) each	1 November 1955
9	One (1) kit	1 January 1956

- (b) Unless otherwise provided herein all items described in Part I shall be delivered and installed in the Dissemination Control Division of the Directorate of Intelligence, Headquarters, USAF, Mashington, D. C.
- (c) All reports called for hereunder shall be delivered to the Government by the Contractor, at his own expense, in accordance with schedule outlined in paragraph (a) addressed to the Commander, Rome Air Development Center, Griffiss Air Force Base, Rome, New York, ATTN: RCRES-4C, marked for Contract AF30(602)-1188.
- (d) Drawings, Design Data, Handbooks of Instructions, Spare Parts List, and other literature requirements not covered in (c) shall be delivered to the Government, at Contractor's expense, in accordance with schedule outlined in paragraph (a), addressed to Commander, Rome Air Development Center, Criffies Air Force Base, Rome, New York, AITN: RCBCB, marked for Contract AF30(602)-1188.
- (e) All applications hereunder for Government bills of lading and Tax Exemption Certificates shall be made to the Commander, Rome Air Development Center, Griffiss Air Force Base, Rome, New York, ATTN: RCHCB.

PART VII - INSPECTION

Final inspection and acceptance by the Government of all equipment to be furnished under this Contract will be made at the Dissemination Control Division of the Directorate of Intelligence, Headquarters, USAF, Washington, D. C. Final inspection and acceptance of all supplies and services to be furnished under this Contract, except equipment items, will be made at Rome Air Development Center, Rome, New York. The Contracting Officer shall have the right to require such preliminary inspection or inspections at the plant or plants of the Contractor as he shall deem necessary. Further provisions regarding inspection are contained in Clause 3 of the General Provisions.

W OF WI

PART VILL - CLASSIFICATION

This Contract has a security classification of "Unclassified." Detailed classification of items of information is set forth in Security Requirements Check List, DD-25%, attached hereto and hereby rade a part of the Contract.

PART IX - COMPRETUAL CONTENTS AND ALTERATIONS

(a) This Contract consists of (1) a Sobedule containing Parts I through IX on pages i through vi; (2) General Provisions containing Clauses 1 through 39 on pages 1 through 22, including pages 8a and 8b; (3) Exhibit "A" commisting of Perchase Request Continuation Sheet for Minicard Information and Intelligence Data Handling System and Exhibit RADC-1695, dated 14 April 1954, as amended by respective Amendments No. 1 dated 30 April 1954; (4) Form DD 254 "Sommity Requirements Check List" dated 5 May 1954. The following are the Ceneral Provisions incorporated in and made a part of this Contract:

> Clause 1 - Definitions Clause 2 - Chengos Clause 3 - Inspection Clause 4 - Reimbursement Clause 5 - Assignment of Claims Clause 6 - Dolay in Performance Clause 7 - Disputes Clause 8 - Notice and Assistance Regarding Patent Infringement Clause 9 - Convict labor Clause 10 - Eight-Hour Law of 1912 Clause 11 - Mondiscrimination in Employment Clause 12 - Officials Not To Benefit Clause 13 - Covenant Against Contingent Fees Clause 14 - Termination Clause 15 - Notice To The Government of Labor Disputes Clause 16 - Reporting of Royalties Clause 17 - Subcontracts Clause 18 - Reproduction Rights Clause 19 - Employment of Aliens Clause 20 - Government Property Clause 21 - Guaranty Clausa 22 - Insurance Clause 23 - Release Provisions Clause 24 - Gratuities Clause 25 - Renegotiation Clause 26 - Military Security Requirements Clause 27 - Additional Provisions to be Inserted in Cost-Plus-A-Fixed-Fee Subcontracts Clause 28 - Walsh-Healey Public Contracts Act

ITEM		QUAN	TITY		DESCRIPTION
					Investigation and Study leading to the design of an Information and Intelligence Data Handling System in accordance with applicable paragraphs of Exhibit RADC-1695 dated 14 April 1954, titled "Minicard Information and Intelligence Data Handling System".
2		2	sets		Interim Engineering Reports for Item 1 in accordance with USAF Specification No. 40146-A dated 5 November 1947 and Amendment thereto. One set shall be furnished six (6) months after commencement of work and the second report to be furnished fifteen (15) months after commencement of work under Item 1 and shall consist of one (1) copy in the "Reproducible Copy" form and 25 copies in the "Non-Reproducible Copy" form as specified in Paragraph E-7 of the Specification. This report will
	-Îζţ;÷··				outline in detail functional specifications of equipment outlined in Paragraph 3.3.1 of Exhibit RADC-1695. Should the results of the study indicate the feasibility of the deletion or addition of equipments to Paragraph 3.3.1, this report will present justification for the deletion therefrom or addition thereto.
3		1	each		Engineering Model, Information and Intelligence Data Handling Systems, shall be fabricated in ac- cordance with applicable paragraphs of Exhibit RADC-1695 dated 14 April 1954 titled "minicard Information and Intelligence Data Hadling System".
4	e .	1	set		Interim Letter Progress Reports for Items 1 and 3 shall be furnished monthly covering the progress and status of the study and development. These reports may be prepared in the form of a letter

Approved For Release 2002/06/13: CIA-RDP81B00878R000800120047-5

West 2

PRCS dated 14 April 1954 Information and Intelligence Data Handling System

	and shall be submitted by the 20th of the month following that for which it was written. These reports shall include progress of the past month and planned activity for the following month and shall be required until the progress of the work in the judgment of the Contracting Officer or an approaching time limit indicates that the final reports shall be furnished.
5 l set	Final Engineering Report for Items 1 and 3 in accordance with USAF Specifications No. 40146-A, dated 5 November 1947 and Amendment thereto. The set furnished shall consist of one copy in "Reproducible Copy" form and 25 copies in "Non-Reproducible Copy" form as specified in paragraph E-7 of the Specification. The copies shall be furnished within thirty (30) days following delivery of equipment under Item 3.
	NOTE: Each report shall be plainly marked to indicate the existence of copyright, proprietary, and patent information within the contents of the report.
6 1 set	Reproducible Copies of Engineering Sketches. Drawings and Design Data used in the fabrication of Item 3. The copies shall be submitted not more than thirty (30) days after delivery of the equipment. The original drawings shall be prepared in accordance with MIL-D-9281 (USAF), and shall include all revisions resulting from inspection of the equipment. Reproducible copies shall be Direct Reading VanDyke negatives in accordance with Specification MIL-D-5480.
7 7 cys	Handbook of Instructions for Item 3 in accordance with Type I of Exhibit RADC-3000B dated 31 March 1953.
8 leach	List of Spare Parts. The contractor shall furnish one reproducible list of replaceable parts which shall include all parts normally subject to replacement in the testing and evaluation of the equipment required under Item 3. Spare parts Key No. 23 dated 20 March 1953 may be used as a guide

Interim Spare Parts shall consist of only those parts approved by the Contracting officer after

review of the list of replaceable parts

1 kit

PRCS dated 14 April 1954 for Information and Intelligence Data Handling System

requires under Item 8. Spare parts shall be interchangeable with the corresponding parts used in the equipment under Item 3 and shall be delivered concurrently with Item 3.

Requirements

Por

MINICARD INFORMATION AND INTELLIGENCE AND DATA HANDLING SYSTEM, INVESTIGATION, STUDY, DESIGN, AND FABRICATION OF

Exhibit RADC-1695 14 April 1954

1. SCOPE

- 1.1 Type This exhibit covers the system described in preliminary reports prepared by Eastman Kodak Company dated May 1953 Revised March 1954 and November 1953, entitled "The Mini-Card System".
- 1.2 Phases The program covered by this exhibit is set up in three phases, as follows:

Phase I - System Study Phase

Phase II - Equipment Development

Phase III - Installation and Follow-up

Under Phase I, a thorough study will be undertaken of the Intelligence Library, Collection Division, Directorate of Intelligence, Hq USAF, and the Central Film Library, Aeronautical Chart and Information Center. This study shall determine initially the types and functional specifications of each of the individual units of equipment and the system design required in the development of an adequate Data Handling System. The study shall continue throughout Phase II and shall include the handling of other reconnaissance information in order to retain sufficient flexibility in the equipment and system to provide for future expansion.

Phase II shall be accomplished concurrent with Phase I and shall include the development of individual units of Mini-Card equipment required to handle the type of data processed by the Intelligence Library, Collection Division, Directorate of Intelligence, Hq USAF.

- 2. APPLICABLE SPECIFICATIONS, STANDARDS, DRAWINGS AND PUBLICATIONS
- Equipment delivered under this contract shall be fabricated in accordance with good commercial practices.
- 3. REQUIREMENT Approved For Release 2002/06/13 : CIA-RDP81B00878R000800120047-5

Exhibit RADC-1695 dated 14 April 1954

3.1 General Requirements. - The design and fabrication of equipment to form an integrated Information and Intelligence Data Handling System. The system will be capable of handling the types; of data now processed by the Intelligence Library, Collection Division, Directorate of Intelligence, Hq USAF.

A mechanized system is required that will rapidly and efficiently perform the following functions in the handling of such data: (1) classify, (2) index, (3) code, (4) file, (5) store, (6) search, (7) correlate, (8) retrieve, (9) view, (10) reproduce, (11) disseminate. This shall result in appreciable reduction in the time, personnel, and manpower requirements over the present methods being employed.

3.2 System Study Phase: Phase 1.

3.2.1 The contractor shall undertake a thorough study of the Intelligence Library and the Central Film Library and design a Mini-Card System which will handle the types of data processed by these agencies. This study shall be continuous throughout the term of the contract and shall include the handling of other reconnaissance information in order to retain sufficient flexibility in the equipment and system to provide for future expansion. Experimental work not directly related to the design of specific components but more concerned with the eventual integration of other kinds of intelligence information into the system shall not be undertaken without the prior approval of the Contracting Officer.

3.2.2 Results of Study

- 3.2.2.1 At the end of the six months after initiation of the contract, the contractor shall furnish a report which will provide the system design and the functional specifications for the component equipment to be delivered under Item 3.4.
- 3.2.2.2 Three months prior to installation of engineering model of equipment as specified under Item 3.4, a comprehensive report on the feasibility of the mini-Card system as an ultimate information and intelligence data system shall be delivered and provide as a minimum the following information:
 - a. Estimated cost of operation of the Mini-Card system to handle the intelligence data of the Intelligence Library, Collection Division, Directorate of Intelligence, Hq USAF, and the Central Film Library, ACIC, for a period of (1) year.
 - b. Operating personnel requirements to handle the operation of engineering model delivered under Item 3.4
 - c. Training requirements for operating personnel.
 - d. Maximum card processing speed when color film is used.
 - e. Capability of system for the reproduction of charts, maps, and photographs in color.
 - f. Adapatability to field use and air trasportability.
 Approved For Release 2002/06/13: CIA-RDP81B00878R000800120047-5

Exhibit RADC-1695 dated 14 April 1954

3.3 Equipment Phase: Phase 2.

- 3.3.1 Undertake the development of an engineering model of each piece of Mini-Card equipment which the study indicates will be required for the documentary system. The following list of equipment is based on the tentative system described in the pre-liminary report of the Eastman Kodak Company report entitled "The Mini-Card System" dated November 1953. This list of specific items shall be revised as required as the system design advances. A brief description of the individual items is as follows:
 - a. Flexowriter to prepare paper tapes for controlling the camera and enlarger.
 - b. Minicard Camera to record code and image information.
 - c. Film Processor to process minicard film.
 - d. Minicard Duplicator to make duplicate minicards.
 - e. Minicard Block Sorter to sort by category directly into a file.
 - f. Minicard Automatic Sorter for complete sorting.
 - g. Minicard Selector to search for specific code combinations.
 - h. Minicard Enlarger to make enlarged paper prints from minicard images.
 - i. Minicard Viewer to provide a visual means of inspecting minicards.
- 3.4 Installation and Follow-Up of an Engineering Model of an Information and Intelline Card ence Data Handling System. A working engineering model of each piece of Mini-Card ipment will be integrated into an Information and Intelligence Data Hadling System and installed in the Collection Division of the Directorate of Intelligence, Hq USAF, so that a complete pilot operation can be tested.

4. TEST PROCEDURES

- 4.1 Tests and Inspection. Tests and inspection shall be performed on the Information and Intelligence Data Handling System by the contractor to determine and demonstrate compliance of the system with the overall requirements of this exhibit prior to acceptance.
- 4.1.1 Prior Tests by Contractor.— No equipment shall be submitted to the Government for acceptance unless it has been satisfactorily tested by the contractor in accordance with the requirements of this exhibit. At the option of the Contracting Officer, Government personnel may witness such tests.
- 4.1.2 Upon completion of the test at the contractor's plant, as specified in paragraph 4.1.1, a test of the engineering model will be made at the Collection Division of the Directorate of Intelligence, Hq USAF, Washington, D. C. This test will be under the direction of the Air Force with the assistance of contractor personnel.

Approved For Release 2002/06/13: CIA-RDP81B00878R000800120047-5

-3-

Exhibit RADC-1695 dated 14 April 1954

4.2 Test Procedures. - Test procedures and methods for testing and inspecting the equipment shall be prepared by the contractor and submitted to the Contracting Officer for approval at least thirty (30) days prior to the anticipated date of inspection or tests. The test program prepared by the contractor shall demonstrate that the performance, operation, material, and workmanship of the equipment is in compliance with the requirements of this exhibit. i.e. The types of information now handled by the Intelligence Library, Collection Division, Hq USAF, would be processed into the Mini-Card System and studied in parallel with the existing operation.
